Individual

Data Mapping

Excel Mapping

- **Source Data**
  - Specify source system data structures
- **Validation Rules**
  - Specify source-specific data validation rules
- **Transformations**
  - Standardize data where desired
  - Retain underlying source variation where desired
- **Calculations**
  - Specify supporting or custom calculations (e.g. Coverage Example cost sharing)
- **SBCSolved Inputs**
  - Map data into SBCSolved system inputs

Other Mapping

SBC Generation

- SBCSolved implements or accommodates the 29 pages of February 2012 DOL rules governing the generation of 8-page SBCs
- SBCSolved generates SBCs in paper, PDF, HTML, and other formats as a **batch process** and **web service**

- Using data mappings configured in Excel, SBCSolved can generate SBCs directly from source systems
- Insurers can independently map source system data to standard SBC system inputs

SBC Distribution

Email
Distribute SBCs attached to custom policyholder emails

Portal
Publish PDF or HTML SBCs to policyholder portals and distribute custom notification emails containing SBC links

HTTP

Printer
Print SBCs and accompanying custom release letters/ communications for mailing
